## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of image processing and a method of replacing an image background in a video sequence. Independent claim 1, identifies the uniquely distinct feature, "for revising a probability for an input pixel according to a probability that a neighboring pixel is a pixel of one of a background and a foreground and a relationship of said input pixel and a pixel structure included in said image"; Independent claim 43, identifies the uniquely distinct feature, "for revising a probability for an input pixel according to a membership of said input pixel in a pixel structure and a probability that a neighboring pixel is a pixel of one of a background and a foreground and substituting a new background pixel for a spatially corresponding input pixel classified as a background pixel"; Independent claim 59, identifies the uniquely distinct feature, "for revising a background reference pixel if a revised classification of a spatially corresponding input pixel classifies an input pixel as a background pixel and substituting a new background pixel for said input pixel if said input pixel is classified as a pixel of said background". The closest prior art, Korn (USPN 5,781,198), discloses

wherein an image mask is generated representing the similarities and differences between the actual background image and the current image, while a new image is generated in response to the image mask and contains portions of the current image and portions of the replacement background image; while Rosenberg (USPN 6,798,897 B1), discloses real time image registration, motion detection and background replacement using discrete local motion estimation, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
